PROFESSIONAL EXPERIENCE

Consultant, Julius Baer, Zurich **10/2024 - 03/2025**

Context: *Expert in Order Management Systems, engaged as contractor through Rugby AG, accepted the challenge to analyze a complex legacy core banking system and to document its intricate business flows in a simplified, accessible manner.*

- Documented complex legacy OMS core banking system by clearly describing business flow interactions with surrounding applications.
- Clarified business validation rules for instruments, clients, and markets.

Technologies: IBM Mainframe, IBM OMS, Temenos PMS Triple A, FIX, SWIFT, Bloomberg, EUREX, Oracle SQL

Product Manager, UBS, Zurich **04/2024 - 10/2024**

Context: *While maintaining production stability, the main assignment was to prepare funds orders migration from Credit Suisse to UBS for Luxembourg and APAC clients.*

- Managed the migration of Credit Suisse funds orders into UBS systems, aligning business and IT across global regions.
- Contributed to end-to-end testing design and execution.

Technologies: Temenos T24, FTP, Web Services, Oracle SQL

Senior Business Analyst, Credit Suisse, Zurich **05/2017 - 04/2024**

Context:
Transitioned to a permanent role to lead strategic initiatives in funds business with the help of four scrum teams covering Pre-Trade, Execution, Post-Trade and Static Data applications.

- Modernized funds execution platform and increased STP rate to 99%.
  - Led meetings for defining order statuses and alerts based on funds business processing.
  - Managed the expansion of e-connectivity with Fund Administrators and Custodians.
  - Supported Funds Execution integration with upstream and downstream channels.
- Contributed to building a new Product Manager and reduced time to market by 300%.
  - Aligned roadmaps for instruments creation, routing, and cut-off management modules.
  - Collaborated with Business and IT to define and validate stories, and acceptance criteria.
  - Supported continuous delivery by optimizing automated tests.

Technologies: REST API, JSON, Cucumber/ test automation, Jenkins, Splunk, FXML, FIX, SWIFT, Jira, HP ALM

IT Business Analyst, Credit Suisse, Zurich **12/2015 - 05/2017**

Context:
Joined the biggest Swiss bank via Stamford Consults AG, the objective was to provide a team of six developers, direction, and user stories to automatize hedge funds execution business.

- Led meetings with IT and Business to clarify and describe hedge funds manual execution business.
- Proposed, validated, tested and demoed automated solutions for order monitoring, placement, and executions with fund administrators.

Technologies: Confluence, Balsamiq, Jira, HP ALM

Business Analyst, Societe Generale, Zurich **05/2014 - 11/2015**

Context:
After completing the CFA in Paris, pursued the next step in Wealth Management Private Banking by moving to Switzerland as a contractor via Alcyane Consulting. The objective was to homogenize Triple A (Portfolio Management System) across UK and Switzerland entities.

- Elaborated screen flows and design for FX and Money Market order entries.
- Built a new interface between Triple A and market gateway.
- Executed test cases, identified, analyzed, and reported bugs.

Technologies: PMS Triple A, Market Gateway, FIX, Jira, Microsoft Office

Account Manager, Horizon Software, Paris **10/2009 - 04/2014**

Context:
After working in London with a focus on hedge fund portfolio construction and risk analytics, moved to Paris to dive into the world of trading and market connectivity. Joined Horizon Software as a Test Engineer and grew into an Account Manager, supporting two major banks in optimizing their market making and hedging platforms.

- Implemented automated tests for options market making and hedging using Scala language.
- Defined functional specifications and tested options strategies creation on EUREX.
- Shared knowledge by organizing internal and external training.

Technologies: Algo Trading, Scala, Market Gateway, EUREX

Account Manager, AlternativeSoft, London **01/2008 - 08/2009**

Context:
After a Master's in International Finance and a thesis on hedge funds, moved to London to gain experience in alternative investment risk metrics, at the heart of the financial industry. Also started CFA certification.

- Client Relationship Management for hedge funds portfolio construction and optimization.
- Learned and explained to future clients risk metrics related to non-normal distribution.

Junior Consultant, Arolys, Paris **06/2004 - 08/2006**

Context:
Motivated by a desire to launch an international career, moved from Lebanon to Paris to begin a consulting role focused on cross functional collaboration and cost optimization.

- With the help of a multidisciplinary team (Marketing, R&D, Production, Accounting) the objective was to provide simple methods to optimize a product or a service through functional and value analysis.
